The 1st 第一屆 ICTCMT

International Conference on Traditional Chinese Medicine Tele-healthcare

Developing TCM Tele-Healthcare Strategies to Combat COVID-19 and Post COVID Conditions

中醫遠程醫療國際研討會～發展中醫遠程醫療策略應對新冠及新冠後遺症

This online event is organized by the School of Chinese Medicine, Hong Kong Baptist University, in collaboration with the World Federation of Acupuncture-Moxibustion Societies (WFAS). It will revolve around the practical and timely theme “Developing TCM Tele-Healthcare Strategies to Combat COVID-19 and Post COVID Conditions”, and will lay a global platform for interaction and discussion on the development of tele-healthcare in the field of traditional Chinese medicine.

If you are interested in TCM tele-healthcare, this conference is right for you. We are inviting researchers, industry leaders practitioners, and students of healthcare professions from different parts of the world to meet at this online conference to share the latest research findings and clinical experiences on TCM tele-healthcare. It will be your unique opportunity to hear from frontline experts in the field, to network with peers from the industry and academia, and to gain practical insights into the latest advances and challenges in this rapidly evolving area.
